

Encapsulated StructureLite™ Module

With a focus on low-mass seating alternatives, encapsulated Structural Seat Foam (such as Woodbridge's StructureLite™) combines the structural seating support with the urethane seating pad molded together as a single seat module.

Applications

- + Seatbacks
- + Seat cushions
- + Seat frames
- + Seating systems

Advantages

- + Provides a low mass solution while maintaining occupant comfort and seating performance
- + Seating system optimization available when designed as a single module
- + Improves craftsmanship and durability
- + Reduces part count in seat assembly
- + Simplifies complete seat assembly process
