

Rear Seatback Bolster Foam Interior

Our rear seat bolster foam technology delivers optimal control over initial softness and support as well as long-term performance. We produce a wide range of bolster foams from small to very large-sized parts. These components cover a spectrum of desired hardness and density ranging from soft to firm.

We offer secondary operations including assembly, cover insertion, and packaging.

Applications

- + Rear seatback bolster

Advantages

- + Superior finished appearance
- + Repeatable performance
- + Reduced cost
