

# Seat Back Bolster Seating

Woodbridge brings advancements in seating technology with our seat back bolsters. Part of our StructureLite™ technology, Woodbridge seat back bolsters allow for part consolidation, mass reduction, and cost reductions in both piece price and tooling as compared with existing seat bolster technology.

## Applications

- + Seating

## Advantages

- + Vertically integrated manufacturing approach
- + Full engineering and design
- + Complete trim pattern design and development
- + Chemical development and bio technologies
- + Complete polyurethane and bead foam manufacturing systems
- + Strategic supply base for plastic and metal components
- + Integrated assembly processes
- + Strategic global footprint
- + Safety solutions for FMVSS202A
